

Thank You

Kentucky healthcare providers!

You are recommending colon cancer screening to your patients -- and it shows! Over the past 17 years, **Kentucky's colon cancer screening rate has improved more than any other state in the country.** Kentucky BRFSS data for 2016 shows that over 70% of eligible Kentuckians had been screened for this preventable, treatable disease.

**Your work has changed lives. Thank YOU,
The Kentucky Cancer Consortium Colon Cancer Committee
