

Lung Cancer Screening Programs: *The Impact of SARS-CoV-2/COVID-19*

GOAL: To gather perspectives on the impact of SARS-CoV-2/COVID-19 on lung cancer screening (LCS) programs and to develop resources to address LCS program implementation challenges.

WHO is coordinating this project?

- University of Kentucky, on behalf of the Kentucky LEADS Collaborative

WHAT does this project hope to achieve?

- Gather information on the impact of the COVID-19 pandemic, and develop resources to help LCS implementation

WHEN will the project occur?

- Given the time-sensitivity of the topic, the project is going on now and moving rapidly

WHERE is this initiative taking place?

- Via online surveys and online interviews

HOW do we plan to address these challenges?

- Provide online surveys to gather information on the impact to the LCS program
- Conduct online interviews to gather further information on the impact to the LCS program

WHO is involved in the initiative?

- The Kentucky LEADS Collaborative at the University of Kentucky
- Program coordinators, navigators, and/or medical directors of LCS programs throughout Kentucky

WHY is my involvement needed?

- You are a program coordinator, navigator, or medical director associated with a LCS program within Kentucky
- We need your help and your unique perspectives regarding the impact of SARS-CoV-2/COVID-19 to better understand how this affects LCS and to develop resources to help LCS programs in the future

WHO can I contact for more information?

- **Trey Alexander, Kentucky LEADS Collaborative Research Project Manager**
joseph.alexander@uky.edu
- **Allyson Yates, Kentucky LEADS Collaborative Program Director**
a.yates@uky.edu
